**Jackson A. Haynes** | Corvallis, OR | (458) 221-5511 | haynesbrain.com
haynejac@oregonstate.edu | linkedin.com/in/jackson-haynes-62992232b | github.com/HaynesJackson

## EDUCATION

**Oregon State University**, Corvallis, OR – 3.92 GPA, Honors B.S. – Computer Science, option in Cybersecurity – expected June 2028

- Minors in Cybersecurity Management (BIS) and French
- OSU Honors College Faculty-Led France Study Abroad | *June 16 - July 4, 2025*
- OSU College of Engineering Dean's List – (6) consecutive terms

## TECHNICAL SKILLS

**Languages**: C/C++, Python, SQL, HTML, JS, CSS, Assembly x86
**Frameworks/Libraries:** React, Tailwind CSS, Vite, OpenCV, NumPy, Matplotlib, YOLO, LiteLLM, Rich
**Tools:** Drupal CMS, Linux Command Line, GitHub/Git, VS Code, Vim

## EXPERIENCE

**Honors College Undergraduate Research and Thesis** – *OSU College of Agriculture*, Corvallis, OR
January 2026 - Present

- Built a Python/OpenCV pipeline that detects bacterial microcolonies in microscopy images and exports per-group results to CSV for analysis
- Systematically tuned detection thresholds across antibiotic concentration (MIC) groups and timepoints to improve consistency of colony counts
- Currently training YOLO object-detection models for multi-colony detection and strain classification

**Research Assistant/Website Developer** – *Oregon State University School of MIME*, Corvallis, OR
March 2025 - Present

- Write weekly briefs on emerging tech in logistics, AI, communications, and transportation for Dr. Funk
- Building a website for Dr. Funk's forthcoming book in Drupal and HTML, with manuscript conversion

**Shift Lead** – *Hawaiian Time*, Eugene, OR
June 2023 - September 2025

- Led a crew of 5-6 per shift, training new staff on procedures and food safety standards
- Kept service quick and consistent during rushes while meeting team and communication standards

## PROJECTS

**haynesbrain.com |** *React, JS, Tailwind CSS*

- Personal portfolio website rebuilt from vanilla HTML/CSS into a React/Vite/Tailwind site, deployed on GitHub Pages

**CrossWire |** *Python, LiteLLM, OpenRouter*

- Co-built at BeaverHacks with a team of 5: a benchmark where two LLMs defuse a simulated bomb scenario.
- Built the puzzle engine (wires, button, Cyclogram, Base64) that models each module's state and manuals.
- Tested 4 LLM self-pairings: Gemini Pro finished in 4 turns, Opus 4.6 in 7; Flash stalled on Cyclogram, GPT-4o-mini on sign-offs

## LEADERSHIP/AWARDS/INTERESTS

- Officer of Badminton Club; member of ACM and DAM Security (cybersecurity club)
- CTFs – UCLA CTF, OSU CTF; hackathons – BeaverHacks 2026, QuackHacks 2026
- 1st place for Best Video Game - CodeORCreate, December 2023
- ~100 volunteer hours organizing outgoing food collections at Food for Lane County
